

Sprint 3 Review
HoneyDo
Project Team 1
6/2/17

Actions to stop doing:

Members need to stop making new branches and delete old branches that are not in used. Members need to stop naming variables that are hard to understand. Members need to stop feeling bad about doing stand-up meetings.

Actions to start doing:

Members need to start immediately notifying members what part they are working on, so no members are working on the same thing. Members need to merge as soon as possible to master so other members can work on the latest changes.

Actions to keep doing:

We need to keep updating our trello board. We need to keep meeting regularly at least 3 time a week. We need to keep our lengthy 2 hours meeting as that increases our productivity.
