Actions to stop doing

As a group, we've decided to stop neglecting the SCRUM board. Other than that, there's nothing that stands out as a problem in our group's process.

Actions to start doing:

Looking at the Burn-up chart for this sprint, it's clear that the team need to be more proactive with completing tasks. We are quick to commit to them, but when it comes to actually doing the work, sometimes we are a little lacking. We also need to be more talkative in the online group chat, so that we can give each other more updates when not in person.

Actions to keep doing:

The team makes extra efforts to meet in person, and that is really helping with communication and team morale.

Work completed/not completed:

Completed:

- As a user I want a calendar so that I can schedule my days, events, classes, and todo's.
- As a developer, i want to have a database to store users
- As a user I want to put all my todo's in one list, so that I can see everything I need to get done
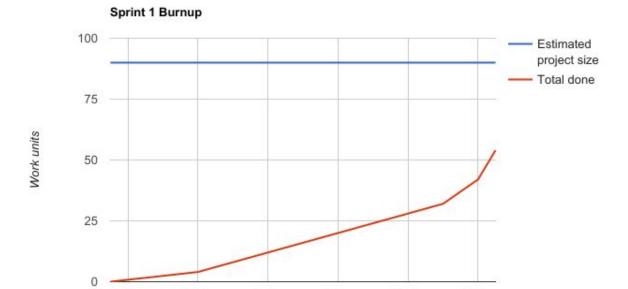

Not Completed:

- As a user, I want to assign my tasks to different days w/o assigning it to certain times
- As a user I want to be have text updates the day before or the ability to delete/modify todo's or events

Work completion rate:

Total number of user stories completed: 3
Total number of estimated ideal work hours completed: 54
Total number of days: 22
